DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to voice recording with uplink and downlink, classified in class 455, subclass 412.
 - II. Claims 8, 9, drawn to multimedia signal recording, classified in class 379, subclass 88.13.
 - III. Claims 10-13, drawn to data structure, classified in class 707, subclass 100.
 - IV. Claims 14-19, drawn to display, classified in class 455, subclass 566.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions group I relates to voice recording and group III relates to data structure.
3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because group I relates to voice recording and group II relates to voice and video

recording and time matching between voice and video. The subcombination has separate utility such as time matching between voice and video.

4. Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions group I relates to voice recording and group IV relates to display information.

5. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions group II relates to voice and video recording and time matching between voice and video and group III relates to data structure.

6. A telephone call was made to attorney Szegien Peter Chow (Reg. No. 39,524) on 7/18/02 to request an oral election to the above restriction requirement, but did not result in an election being made since the phone number is no longer in service.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yuwen Pan whose telephone number is 703-305-7372. The examiner can normally be reached on 8-5 M-F.
